Editorial Board

Australia:	Professor E. J. Anderson, University of New South Wales, Sydney
Belgium:	Professor W. Herroelen, Katholieke Universiteit Leuven
Canada:	Professor G. Abdulnour, Université du Québec à Trois Rivières
France:	Professor F. B. Vernadat, European Commission, Luxembourg
Finland:	Professor H. E. Andersin, Helsinki University of Technology
Germany:	Professor H. Dyckhoff, RWTH Aachen
	Professor G. Zülch, Karlsruhe University
Greece:	Professor C. H. T. Papadopoulos, Aristotle University of Thessaloniki
India:	Professor S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor M. Barad, Tel-Aviv University
	Professor A. Shtub, Technion, Haifa
Italy:	Professor A. Villa, Torino Polytechnic
Japan:	Professor M. Yoshimura, Kyoto University
	Professor H. Ohta, Setsunan University, Osaka
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven
	Dr E. M. Goldratt, Dijkstraat, VG Roelofarendsveen
New Zealand:	Professor L. M. Corbett, Victoria University of Wellington
Poland:	Professor Jan Weglarz, Poznan University of Technology
PR China:	Professor E. W. T. Ngai, Hong Kong Polytechnic University
	Professor G. G. Zhang, Chongqing University
Serbia:	Professor P. Kovac, University of Novi Sad, Vojvodina
Singapore:	Professor A. Y. C. Nee, National University of Singapore
South Korea:	Professor H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor R. W. Grubbström, Linköping Institute of Technology
Taiwan:	Professor A. C. Lin, National Taiwan University of Science & Technology, Taipei
United Kingdom:	Professor K. Case, Loughborough University
	Professor T. J. Hill, University of Oxford
	Professor R. H. Hollier, University of Manchester
	Dr S. T. Newman, Loughborough University
USA:	Professor J. F. Bard, The University of Texas at Austin
	Professor P. Dewhurst, University of Rhode Island
	Professor E. A. Elsayed, Rutgers State University, Piscataway, NJ
	Professor C.-X. Feng, Bradley University, IL
	Professor B. Gopalakrishnan, West Virginia University
	Professor M. J. Magazine, University of Cincinnati
	Professor F. Mahmoodi, Clarkson University, NY
	Professor S. A. Melnyk, Michigan State University, East Lansing
	Professor D. C. Montgomery, Arizona State University, Tempe
	Professor B. R. Sarker, Louisiana State University
	Professor S. Talluri, Michigan State University
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

International Journal of Production Research

Volume 43, 2005—CONTENTS

No. 1 1 January 2005

Reactive repair tool for job shop schedules. V. SUBRAMANIAM, A. S. RAHEJA and K. R. B. REDDY 1

Unified functional tolerancing approach for precision cylindrical components. X. D. ZHANG, C. ZHANG, B. WANG and S. C. FENG 25

Campaign planning in time-indexed model formulations. C. SUERIE 49

Liquid crystal display surface uniformity defect inspection using analysis of variance and exponentially weighted moving average techniques. B. C. JIANG, C.-C. WANG and H.-C. LIU 67

Impact of technological, organizational and human resource investments on employee and manufacturing performance: Australian and New Zealand evidence. D. CHALLIS, D. SAMSON and B. LAWSON 81

Anti-fragmentation in aversion dynamics scheduling. G. W. BLACK, K. N. MCKAY and S. L. MESSIMER 109

CAE enabled methodology for die fatigue life analysis and improvement. K. K. TONG, M. S. YONG, M. W. FU, T. MURAMATSU, C. S. GOH and S. X. ZHANG 131

Multilevel intelligent scheduling and control system for an automated flow shop manufacturing environment. M. A. S. MONFARED and J. B. YANG 147

Decision support system for rapid prototyping process selection through integration of fuzzy synthetic evaluation and an expert system. H. LAN, Y. DING and J. HONG 169

Integrated approach for disassembly processes generation and recycling evaluation of an end-of-life product. S. GERNER, A. KOBEISSI, B. DAVID, Z. BINDER and B. DESCOTES-GENON 195

No. 2 15 January 2005

Allocating work in process in a multiple-product CONWIP system with lost sales. S. M. RYAN and J. VORASAYAN 223

A simulation-based optimization approach to size manufacturing systems. O. FEYZIOĞLU, H. PIERREVAL and D. DEFLANDRE 247

Concurrent design of a geometric parameter and tolerance for assembly and cost. J. HU and G. XIONG 267

Cyclic lot scheduling with sequence-dependent set-ups: a heuristic for disassembly processes. P. BRANDER and R. FORSBERG 295

Joint replenishment problem under continuous unit cost change. M. KHOUJA, S. PARK and C. SAYDAM 311

Mathematical model for warehouse design and product allocation. S. S. HERAGU, L. DU, R. J. MANTEL and P. C. SCHUUR 327

Model to determine the backup capacity of a wafer foundry. Y.-M. TU, Y.-H. CHAO, S.-H. CHANG and H.-C. YOU 339

Optimal product mix decisions based on the Theory of Constraints? Exposing rarely emphasized premises of Throughput Accounting. R. SOUREN, H. AHN and C. SCHMITZ 361

Design of a Web-based integrated material handling system for manufacturing applications. C. CHO and P. J. EGBELU 375

Finite capacity scheduling—packed placement sequence schedule. R. L. MARTIN and C. WHITE 405

No. 3 1 February 2005

Linking manufacturing postponement, centralized distribution and value chain flexibility with performance. A. NAIR 447

The 3-PRS parallel spindle module with multi-posture vertical and horizontal machining capability. Y. M. HUANG, X. CHENG, F. GAO and J. X. TONG 465

Modelling of semiconductor wafer fabrication systems by extended object-oriented Petri nets. H. LIU, DR. R. Y. K. FUNG and DR. Z. JIANG 471

Rating design requirements in fuzzy quality function deployment via a mathematical programming approach. S.-T. LIU 497

Comparison of distributed methods for resource allocation. T. WU, N. YE and D. ZHANG 515

A new approach to parting surface design for plastic injection moulds using the subdivision method. C. L. LI, K. M. YU and C. G. LI 537

Integrated control chart system—optimization of sample sizes, sampling intervals and control limits. Y. C. LAM, M. SHAMSUZZAMAN, S. ZHANG and Z. WU 563

Design of flexible manpower line walk cycles for a fixed number of operators. D. J. STOCKTON, J. ARDON-FINCH and R. KHALIL 583

Comparison of computational intelligence and statistical methods in condition monitoring for hard turning. R. KOTHAMASU, S. H. HUANG and W. H. VERDUIN 597

Finite capacity scheduling with the placement sequence method, specification for a computer program. R. L. MARTIN 611

Book review 653

No. 4 15 February 2005

The application of STEP-NC using agent-based process planning. R. D. Allen, J. A. Harding and S. T. Newman 655

A model for labour pooling in batch manufacturing. E. Houghton and V. Portougal 671

An integrated approach to evaluating conceptual design alternatives in a new product development environment. Z. Ayag 687

Multivariate double sampling |S| charts for controlling process variability. A. Grigoryan and D. He 715

Development of a production cost estimation framework to support product family design. J. Park and T. W. Simpson 731

Geometric approaches to enhancing edge quality in planar milling. C.-H. Chu and J.-T. Chen 773

Implementing global factory schedules in the face of stochastic disruptions. A. Barua, N. Raghavan, A. Upasani and R. Uzsoy 793

A review of gripping and manipulation techniques for micro-assembly applications. J. Cecil, D. Vasquez and D. Powell 819

A grouping genetic algorithm for the multi-objective cell formation problem. K. Yasuda, L. Hu and Y. Yin 829

Rapid engineering of natural shaped objects with field data capture. G. Blount, R. Jones, A. Liening and R. Massen 855

No. 5 1 March 2005

A review of production planning and control: the applicability of key concepts to the make-to-order industry. M. Stevenson, L. C. Hendry and B. G. Kingsman 869

Integrating quality and maintenance decisions in a production-inventory model for deteriorating items. H. K. Alfares, S. N. Khursheed and S. M. Noman 899

Group technology by an ant system algorithm. A. A. Islier 913

A new strategy for direct tool path generation from measured points. Y. H. Peng and Z. W. Yin 933

Performance comparison of virtual cellular manufacturing with functional and cellular layouts in DRC settings. N. C. Suresh and J. Slomp 945

A simple data transformation of auto-correlated data for SPC. F. K. Wang 981

An empirical investigation into the barriers to postponement. B. Yang, N. D. Burns and C. J. Backhouse 991

Introducing new parts into existing cellular manufacturing systems based on a novel similarity coefficient. I. H. Garbie, H. R. Parsaei and H. R. Leep 1007

OPPS-PRI 2.0: an open and optimized process planning system for prismatic parts to improve the performance of SMEs in the machining industry. T. Dereli and A. Baykasoğlu 1039

No. 6 15 March 2005

An enterprise modeling and integration framework based on knowledge discovery and data mining. E. I. Neaga and J. A. Harding 1089

Optimum machine selection in multistage manufacturing systems. S. Almutawa, M. Savsar and K. Al-Rashdan 1109

Real-time optimum sequencing of wood cutting process. R. Ghodsi and F. Sassani 1127

Effective relational database approach to represent bills-of-materials. A. O. Aydin and A. Güngör 1143

Considering displacement modes in the fleet management problem. L.-P. Bigras and M. Gamache 1171

Improved performance evaluation of tool condition identification by manufacturing loss consideration. J. Sun, G. S. Hong, M. Rahman and Y. S. Wong 1185

An integrated approach for production and distribution planning in supply chain management. Y. B. Park 1205

On-line identification of control chart patterns using self-organizing approaches. R.-S. Guh and Y.-R. Shiue 1225

Variant process planning of castings using AHP-based nearest neighbour algorithm for case retrieval. R. G. Chougule and B. Ravi 1255

HMMs for diagnostics and prognostics in machining processes. P. Baruah and R. B. Chinnam 1275

Book Review 1295

No. 7 1 April 2005

Maximizing supply chain profits with effective order management: integration of Activity-Based Costing and Theory of Constraints with mixed-integer modelling. E. T. Kirche, S. N. Kadipasaoglu and B. M. Khumawala 1297

Multi-agent-based approach to solve part selection and task allocation problem in flexible manufacturing systems. A. K. Tripathi, M. K. Tiwari and F. T. S. Chan 1313

Model-based process monitoring using robust generalized linear models. D. Jearkpaporn, D. C. Montgomery, G. C. Runger and C. M. Borror 1337

Lot sizing in a production system with rework and product deterioration. K. Inderfurth, G. Lindner and N. P. Rachaniotis 1355

Modelling and simulation of a bottling plant using hybrid Petri nets. A. GIUA, M. T. PILLONI and C. SEATZU 1375

Error prevention in robotic assembly tasks by a machine vision and statistical pattern recognition method. S. OKUMURA, N. TAKE and N. OKINO 1397

Stochastic assembly line balancing using beam search. E. EREL, I. SABUNCUOGLU and H. SEKERCI 1411

Joint order batching and order picking in warehouse operations. J. WON and S. OLAFSSON 1427

Modelling and simulation of an intelligent flexible manufacturing system via high-level object Petri nets (HLOPN). Z. M. WU 1443

Sculptured surface tolerance verification with design datums. Y. LI and P. GU 1465

Converting assembly lines to assembly cells at Sheet Metal Products: insights on performance improvements. D. J. JOHNSON 1483

Book review 1511

No. 8 15 April 2005

A comprehensive review of lot streaming. J. H. CHANG and H. N. CHIU 1515

Practical common weight multi-criteria decision-making approach with an improved discriminating power for technology selection. E. E. KARSAK and S. S. AHISKA 1537

Validation and data splitting in predictive regression modeling of honing surface roughness data. C.-X. J. FENG, Z.-G. S. YU and J.-H. J. WANG 1555

Development path of manufacturing firms: an empirical study. C. KAO and H.-T. HUNG 1573

A robust cell formation approach for varying product demands. D. CAO and M. CHEN 1587

Concurrent engineering: A compromising approach to develop a feasible and customer-pleasing product. M. HOQUE, M. AKTER and Y. MONDEN 1607

Integrated process control and condition-based maintenance scheduler for distributed manufacturing control systems. P. KOOMSAP, N. I. SHAIKH and V. V. PRABHU 1625

Tool path generation for five-axis NC machining using adaptive space-filling curves. W. ANOTAIPAIBOON and S. S. MAKHANOV 1643

Integer programming approach to the printed circuit board grouping problem. S. YU, D. KIM and S. PARK 1667

An ABC-based cost model with inventory and order level costs: a comparison with TOC. E. KIRCHE and R. SRIVASTAVA 1685

On-line dispatching rules for vehicle-based internal transport systems. T. LE-ANH and M. B. M. DE KOSTER 1711

No. 9 1 May 2005

A proposed approach for reconfiguration of flexible assembly line systems by motion genes. J. K. L. Ho 1729

Kaizen costing for lean manufacturing: a case study. B. Modarress, A. Ansari and D. L. Lockwood 1751

Simultaneous identification of mean shift and correlation change in AR(1) processes. H. B. Hwarng 1761

Optimization of warehouse storage capacity under a dedicated storage policy. M.-K. Lee and E. A. Elsayed 1785

A framework for identifying differences and similarities in the managerial competencies associated with different modes of product life extension. J. D. Linton and V. Jayaraman 1807

A part-and-tool assignment method for the workload-balance between machines and the minimisation of tool-shortage occurrences in an FMS. Y.-C. Ho and H.-W. Hsieh 1831

Haptic modeling for a virtual coordinate measuring machine. Y. H. Chen, Z. Y. Yang and Y. Z. Wang 1861

A practical exact algorithm for the shortest loop design problem in a block layout. R. Zanjirani Farahani, G. Laporte and M. Sharifyazdi 1879

A reconfigurable platform in support of one-of-a-kind product development. S. Q. Xie, X. Xu and Y. L. Tu 1889

Simultaneous job input sequencing and vehicle dispatching in a single-vehicle automated guided vehicle system: a heuristic branch-and-bound approach coupled with a discrete events simulation model. P. Lacomme, A. Moukrim and N. Tchernev 1911

No. 10 15 May 2005

Heuristics for minimizing total weighted tardiness in complex job shops. S. J. Mason, J. W. Fowler, W. M. Carlyle and D. C. Montgomery 1943

Easing the implementation and change of manufacturing software systems. J. Edwards and I. Coutts 1965

The CAM as the centre of gravity of the five-axis high speed milling of complex parts. L. N. López de Lacalle, A. Lamikiz, J. Muñoa and J. A. Sánchez 1983

CSPS model: Look-ahead controls and physics. M. Matsui 2001

An integrated approach for the concurrent determination of the block layout and the input and output point locations based on the contour distance. J.-G. Kim and M. Goetschalckx 2027

A Web-based system for manufacturing co-ordination in complex supply networks. H. Q. Xu, M. Ristic, C. B. Besant and C. Pradoux 2049

A bill of materials-based approach for end-of-life decision making in design for the environment. B. González and B. Adenso-Díaz 2071

A simulation analysis of factors influencing the flexibility of cellular manufacturing. M. Djassemi 2101

Comparing deterministic, robust and online scheduling using entropy. H.-S. Gan and A. Wirth 2113

The process-oriented multivariate capability index. E. J. Foster, R. R. Barton, N. Gautam, L. T. Truss and J. D. Tew 2135

No. 11 1 June 2005

Minimizing total tardiness of orders with reentrant lots in a hybrid flowshop. S.-W. Choi, Y.-D. Kim and G.-C. Lee 2149

A comparison of focused cellular manufacturing to cellular manufacturing and job shop. C. Canel, F. Al-Mubarak and B. M. Khumawala 2169

Optimal process planning for a combined punch-and-laser cutting machine using ant colony optimization. G. G. Wang and S. Q. Xie 2195

Optimal design methodologies for configuration of supply chains. T. H. Truong and F. Azadivar 2217

An integrated approach to tolerance synthesis, process selection and machining parameter optimization problems. P. Wang and M. Liang 2237

The performance of the number of vehicles in a dynamic connecting transport AMHS. J. T. Lin, F. K. Wang and C. J. Yang 2263

Qualitative modelling of kinematic robots for fault diagnosis. H. Liu, G. M. Coghill and H.-Y. Xu 2277

Conceptual framework for lot-sizing and scheduling of flexible flow lines. D. Quadt and H. Kuhn 2291

An experimental investigation as to the effect of cutting parameters on roundness error and surface roughness in cylindrical grinding. H. Saglam, F. Unsacar and S. Yaldiz 2309

Optimal scheduling for flexible job shop operation. M. C. Gomes, A. P. Barbosa-Póvoa and A. Q. Novais 2323

No. 12 15 June 2005

Special Issue: Production Research in China

Guest editorial

Production research in China. S. Chaudhry, S. Feng, H. Li, L. Li, H. Sui, J. L. Zhang, Z. Zhang and L. Xu 2355

Manufacturing process modelling and decision making:

Fuzzy regression approach to process modelling and optimization of epoxy dispensing. C. K. KWONG and H. BAI 2359

Automated extraction of dimensional inspection features from part computer-aided design models. F. S. Y. WONG, K. B. CHUAH and P. K. VENUVINOD 2377

A polychromatic sets approach to the conceptual design of machine tools. L. XU, Z. LI, S. LI and F. TANG 2397

Genetic algorithm (GA) applications in production research:

A genetic scheduling methodology for virtual cellular manufacturing systems: an industrial application. K. L. MAK, J. S. K. LAU and X. X. WANG 2423

A genetic algorithm-based approach to machine assignment problem. F. T. S. CHAN, T. C. WONG and L. Y. CHAN 2451

Production planning and control:

The implementation of an activity-based costing collaborative planning system for semiconductor backend production. H.-P. HSU and C.-T. SU 2473

Monitoring manufacturing quality for multiple Li-BPIC processes based on capability index C_{pmk}. W. L. PEARN, M. H. SHU and B. M. HSU 2493

Manufacturing strategy:

An outsourcing decision model for sustaining long-term performance. F. WU, H. Z. LI, L. K. CHU and D. SCULLI 2513

Assessing intermediate infrastructural manufacturing decisions that affect a firm's market performance. L. LI 2537

A novel approach to lean control for Taiwan-funded enterprises in mainland China. C.-C. HUANG and S.-H. LIU 2553

Linking management control system with product development and process decisions to cope with environment complexity. Y. LI, L. LI, Y. LIU and L. WANG 2577

Information technology applications in manufacturing:

Digital enterprise management in China: current status and future development. X. F. XU, L. ZHANG, Y. LI and D. C. ZHAN 2593

Development of a financial management system in a CIMS environment. X. ZHOU, P. E. CHAUDHRY, Z. ZHU and F. LI 2603

Architecture and operational mechanisms of networked manufacturing integrated platform. Y. FAN, C. HUANG, Y. WANG and L. ZHANG 2615

Network-integrated manufacturing system. B. DAN, L. LI, X. ZHANG, F. GUO and J. ZHOU 2631

General:

An introduction to Chinese manufacturing research institutions. C. ZHOU and Z. LI 2649

No. 13 1 July 2005

Synchronized scheduling of assembly and multi-destination air-transportation in a consumer electronics supply chain. K. P. Li, V. K. Ganesan and A. I. Sivakumar 2671

Delphi study on supply chain flexibility. R. R. Lummus, R. J. Vokurka and L. K. Duclos 2687

Determination of the optimal part orientation in layered manufacturing using a genetic algorithm. H. S. Byun and K. H. Lee 2709

An innovation process model for identifying manufacturing paradigms. Z. Tang, R. Chen and X. Ji 2725

A first introduction of customer-driven capacity exchange for job shops. M.-G. Huang, P.-L. Chang and Y.-C. Chou 2743

Data transformation in SPC for semiconductor machinery control: A case of monitoring particles. M.-C. Chen, C.-T. Su, C.-C. Hsu and Y.-W. Liu 2759

Optimizing workholding efficiency through fixture function simulation. M. Hamedi 2775

The effect of integrated product development on efficiency and innovation. E. Naveh 2789

Heuristics for the N-product, M-stage, economic lot sizing and scheduling problem with dynamic demand. F. F. Boctor and P. Poulin 2809

Modelling a complex supply chain: understanding the effect of simplified assumptions. H. B. Hwarng, C. S. P. Chong, N. Xie and T. F. Burgess 2829

No. 14 15 July 2005

Operational tactics and tenets of a new manufacturing paradigm 'instant customerisation'. Z. Tang, R. Chen and X. Ji 2873

Flowshop-scheduling problems with makespan criterion: a review. S. R. Hejazi and S. Saghafian 2895

Fuzzy adaptive networks in machining process modelling: dimensional error prediction for turning operations. Y. Jiao, Z. J. Pei, S. Lei, E. S. Lee and G. R. Fisher 2931

An operational perspective of the relationships between the headquarters and the maquiladoras. S. Dowlatshahi 2949

Mental models as a practical tool in the engineer's toolbox. D. Sinreich, D. Gopher, S. Ben-Barak, Y. Marmor and R. Lahat 2977

Diagnosing batch processes with insufficient fault data: generation of pseudo batches. H.-W. Cho and K.-J. Kim 2997

Learning-based adaptive controller for dynamic manufacturing cells. Y. L. Sun, T. M. Chang and Y. Yih 3011

Weighted-loss-function CUSUM chart for monitoring mean and variance of a production process. Z. Wu and Y. Tian 3027

On the considerations for the design of an automated aircraft sheet metal component production loft generation system. K. S. R. K. Prasad and P. Selvaraj 3045

Genetic algorithms and simulated annealing for scheduling in agile manufacturing. L. K. Gaafar and S. A. Masoud 3069

No. 15 1 August 2005

STEP-based feature modeller for computer-aided process planning. S. M. Amaitik and S. E. Kiliç 3087

Anticipation and flexibility in dynamic scheduling. J. Branke and D. C. Mattfeld 3103

Flexibility-enabled lead-time reduction in flexible systems. S. Wadhwa, K. S. Rao and F. T. S. Chan 3131

Coordination of set-ups between two stages of a supply chain using multi-objective genetic algorithms. S. Afshin Mansouri 3163

Comparisons between drum–buffer–rope and material requirements planning: a case study. D. C. Steele, P. R. Philipoom, M. K. Malhotra and T. D. Fry 3181

Efficient optimization of process parameters in shadow mask manufacturing using NNPLS and genetic algorithm. B. Jeong, J. Lee and H. Cho 3209

Rescheduling parallel machines with stepwise increasing tardiness and machine assignment stability objectives. J. Curry and B. Peters 3231

Global optimization of a feature-based process sequence using GA and ANN techniques. L. Ding, Y. Yue, K. Ahmet, M. Jackson and R. Parkin 3247

STEP-based approach for direct slicing of CAD models for layered manufacturing. M. Y. Zhou 3273

The modified critical ratio: towards sequencing with a continuous decision domain. A. Abu-Suleiman, D. B. Pratt and B. Boardman 3287

Corrigendum

Automated extraction of dimensional inspection features from part computer-aided design models. F. S. Wong, K. B. Chuah and P. K. Venuvinod 3297

No. 16 15 August 2005

Special Issue: Supply Chain Management

Guest editorial

Current issues and emerging trends in supply chain management: an editorial perspective. S. Mehra 3299

Supply chain relationship quality, the competitive environment and performance. B. Fynes, S. de Búrca and C. Voss 3303

An inductive framework for enhancing supply chain integration. J. Campbell and J. Sankaran 3321

Impact analysis of customized demand information sharing on supply chain performance. S.-T. Yee 3353

Strategic supply chain management issues in the automotive industry: an Australian perspective. P. J. Singh, A. Smith and A. S. Sohal 3375

An institutional theory perspective of business continuity planning for purchasing and supply management. G. A. Zsidisin, S. A. Melnyk and G. L. Ragatz 3401

Synergies between supply chain management and quality management: emerging implications. B. B. Flynn and E. J. Flynn 3421

Using a just-in-time selling strategy to strengthen supply chain linkages. K. W. Green Jr and R. A. Inman 3437

A strategic framework for the design and implementation of remanufacturing operations in reverse logistics. S. Dowlatshahi 3455

Quantity discount versus lead time-dependent discount in an inter-organizational supply chain. D. Sirias and S. Mehra 3481

Supply chain agility: the influence of industry culture on asset capabilities within capital intensive industries. N. E. Shaw, T. F. Burgess, C. de Mattos and L. Z. Stec 3497

Emerging trends in supply chain architecture. W. T. Walker 3517

No. 17 1 September 2005

A simulation study of pull systems with ascending/descending buffers and stochastic processing times. A. Grosfeld-Nir and M. Magazine 3529

Optimization of multi-pass turning operations using genetic algorithms for the selection of cutting conditions and cutting tools with tool-wear effect. X. Wang and I. S. Jawahir 3543

Travel distance estimation and storage zone optimization in a 2-block class-based storage strategy warehouse. T. Le-Duc and R. (M.) B. M. De Koster 3561

Fuzzy expected value modelling approach for determining target values of engineering characteristics in QFD. Y. Chen, R. Y. K. Fung and J. Tang 3583

Fuzzy estimation for manufacturing flexibility. N. van Hop and K. Ruengsak 3605

Joint economic production allocation and ordering policies in a supply chain consisting of multiple plants and a single retailer. T. Kim, Y. Hong and J. Lee 3619

Layer modelling for the inspection allocation problem in re-entrant production systems. H. RAU, Y.-H. CHU and K.-H. CHO 3633

Order-batching heuristics based on cluster analysis in a low-level picker-to-part warehousing system. H. HWANG and D. G. KIM 3657

Integrating AHP with QFD for robot selection under requirement perspective. A. BHATTACHARYA, B. SARKAR and S. K. MUKHERJEE 3671

Changing from batch to flow assembly in the production of emergency lighting devices. J. W. VAN RHIJN, M. P. DE LOOZE, G. H. TUINZAAD, L. GROENESTEIJN, M. D. DE GROOT and P. VINK 3687

STEP-compliant NC research: the search for intelligent CAD/CAPP/CAM/CNC integration. X. W. XU, H. WANG, J. MAO, S. T. NEWMAN, T. R. KRAMER, F. M. PROCTOR and J. L. MICHALOSKI 3703

No. 18 15 September 2005

Strategic success factors in enterprise resource-planning design and implementation: a case-study approach. S. DOWLATSHAHI 3745

Measuring machine and product mix flexibilities of a manufacturing system. M. I. M. WAHAB 3773

Comparative analysis of vision systems for electroplating surface quality inspection. G. BYRNE and C. SHEAHAN 3787

Management support for the adoption of manufacturing best practices: key factors. M. UNGAN 3803

Bid generation and evaluation for MANPro-based real time scheduling. M. SHIN and M. JUNG 3821

Setup adjustment for discrete-part manufacturing processes with asymmetric cost functions. B. M. COLOSIMO, R. PAN and E. DEL CASTILLO 3837

Feature-based design for process planning of machining processes with optimization using genetic algorithms. D. K. J. SINGH and C. JEBARAJ 3855

Automated manufacturability evaluation system for sheet metal components in mass production. K. V. RAMANA and P. V. M. RAO 3889

ERP research, development and implementation in China: an overview. C. WANG, L. XU, X. LIU and X. QIN 3915

Availability-adjusted X-factor. D. DELP, J. SI, Y. HWANG, B. PEI and J. FOWLER 3933

A note on 'balancing printed circuit board assembly line systems'. E. DUMAN 3955

No. 19 1 October 2005

Enterprise resource planning (ERP) operations support system for maintaining process integration. K. PARK and A. KUSIAK 3959

Design of unidirectional cyclic layouts. İ. K. Altinel and T. Öncan 3983

Examining dampening effects for alternative dampening procedures to cope with system nervousness. C.-J. Ho 4009

Tabu search approach based on a similarity coefficient for cell formation in generalized group technology. D. Lei and Z. Wu 4035

Modelling and analysis of a multiple product manufacturing system with split and merge. J. Li and N. Huang 4049

An empirically derived agenda of critical research issues for managing supply-chain disruptions. J. Blackhurst, C. W. Craighead, D. Elkins and R. B. Handfield 4067

Application of genetic algorithms in production and operations management: a review. S. S. Chaudhry and W. Luo 4083

Interference-free tool path generation for 5-axis sculptured surface machining using rational Bézier motions of a flat-end cutter. W. Zhang, Y. F. Zhang and Q. J. Ge 4103

Reconfiguration: a key to handle exceptions and performance deteriorations in manufacturing operations. M. Bruccoleri, P. Renna and G. Perrone 4125

Fuzzy goal-programming model with an artificial immune system (AIS) approach for a machine tool selection and operation allocation problem in a flexible manufacturing system. F. T. S. Chan, R. Swarnkar and M. K. Tiwari 4147

No. 20 15 October 2005

Special Issue: Enterprise Management

Editorial: Enterprise management and information integration: challenges and technologies. R. G. Qiu 4165

Demand propagation in the extended enterprise: a comparative analysis of product and process design policies. M. J. Meixell and S. D. Wu 4169

Improving supply-chain collaboration by linking intelligent agents to CPFR. M. Caridi, R. Cigolini and D. De Marco 4191

Production control framework for supply chain management—an application in the elevator manufacturing industry. T. P. Lu, T. M. Chang and Y. Yih 4219

Supply-chain networks: a complex adaptive systems perspective. A. Surana, S. Kumara, M. Greaves and U. N. Raghavan 4235

A multi-level approach for network design of integrated supply chains. M. Dotoli, M. P. Fanti, C. Meloni and M. C. Zhou 4267

Prototyping an information system's requirements architecture for customer-driven, supply-chain operations. A. C. Lyons, A. E. C. Mondragon, A. Bremang, D. F. Kehoe and J. Coleman 4289

A learning approach to enhancing machine reconfiguration decision-making games in a heterarchical manufacturing environment. P. McDonnell, S. Joshi and R. G. Qiu 4321

Enterprise-control system integration—an international standard. D. Chen 4335

Modelling inter-task dependencies and control of workflow managements systems based on supervisory control theory. A. Yalcin, A. Khemuka and P. Deshpande 4359

Advanced planning for minimizing makespan with load balancing in multi-plant chain. C. Moon and Y. Seo 4381

Hybrid system dynamic—discrete event simulation-based architecture for hierarchical production planning. J. Venkateswaran and Y.-J. Son 4397

An integrated aggregate and detailed planning in a multi-site production environment using linear programming. A. P. Kanyalkar and G. K. Adil 4431

Modelling and solving engineering product configuration problems by constraint satisfaction. H. Xie, P. Henderson and M. Kernahan 4455

Knowledge provenance in enterprise information. M. S. Fox and J. Huang 4471

No. 21 1 November 2005

Heuristic approach for solving the multi-objective facility layout problem. C.-W. Chen and D. Y. Sha 4493

Optimal control of an unreliable machine using fuzzy-logic control: from design to implementation. M. N. Yuniarto and A. W. Labib 4509

Branch-and-price approach for prescribing profitable feature upgrades. P. Damodaran and W. E. Wilhelm 4539

Computer-aided decision for human task allocation with mono- and multi-performance evaluation. M. Bennour, D. Crestani, O. Crespo and F. Prunet 4559

Automatic defect inspection of patterned thin film transistor-liquid crystal display (TFT-LCD) panels using one-dimensional Fourier reconstruction and wavelet decomposition. D.-M. Tsai and C.-Y. Hung 4589

Development of a performance measurement model for manufacturing companies using the AHP and TOPSIS approaches. M. Yurdakul and Y. T. İç 4609

Optimization of welding parameters for resistance spot welding of TRIP steel with response surface methodology. T. Kim, H. Park and S. Rhee 4643

Route planning for automated guided vehicles in a manufacturing facility. B. R. Sarker and S. S. Gurav 4659

Performance of carousel systems with 'organ-pipe' storage. B. C. Park and Y. Rhee 4685

No. 22 15 November 2005

An improved branch and bound procedure for scheduling a flow line manufacturing cell. J. SCHALLER 4697

Solving a fixture configuration design problem using genetic algorithm with learning automata approach. A. M. CHOUBEY, PRAKASH, F. T. S. CHAN and M. K. TIWARI 4721

Multiple-input single-output (MISO) ridge-optimizing quality controller for semiconductor manufacturing processes. S.-K. S. FAN 4745

Range, work in progress and utilization. H. JODLBAUER 4771

Solution of facility layout problems with pickup/drop-off locations using random search techniques. S. K. DEB and B. BHATTACHARYYA 4787

Distributed project scheduling with information sharing in supply chains: part I—an agent-based negotiation model. J. S. K. LAU, G. Q. HUANG, K. L. MAK and L. LIANG 4813

Scalable reconfigurable equipment design principles. P. SPICER, D. YIP-HOI and Y. KOREN 4839

Agglomeration economies and vertical alliances: the route to product innovation in biotechnology firms. C. QUINTANA-GARCÍA and C. A. BENAVIDES-VELASCO 4853

The design of an agent for modelling supply chain network dynamics. J. M. ALLWOOD and J.-H. LEE 4875

No. 23 1 December 2005

Distributed project scheduling with information sharing in supply chains: part II—theoretical analysis and computational study. J. S. K. LAU, G. Q. HUANG, K. L. MAK and L. LIANG 4899

Optimal inventory control of lumpy demand items using (s, S) policies with a maximum issue quantity restriction and opportunistic replenishments. R. H. HOLLIER, K. L. MAK and K. F. C. YIU 4929

Impact of inspection errors on the performance measures of a general repeat inspection plan. S. O. DUFFUAA and M. KHAN 4945

Consignment stock of inventories in the presence of obsolescence. A. PERSONA, A. GRASSI and M. CATENA 4969

Fast tool path generation by the iso-scallop height method for ball-end milling of sculptured surfaces. J.-H. YOON 4989

Comparative study of push and pull systems considering quality performance in a cell-based job shop environment. J.-W. LI 4999

Economic design of exponential charts for time between events monitoring. C. W. ZHANG, M. XIE and T. N. GOH 5019

A desired load distribution model for scheduling of unrelated parallel machines. Y. LI, W. SHEN, H. GHENNIWA and C. WANG 5033

Automated synthesis of modular fixture designs using an evolutionary search algorithm. F. Mervyn, A. S. Kumar and A. Y. C. Nee 5047

Mixed-Integer Linear Programming approaches to shelf-life-integrated planning and scheduling in yoghurt production. M. Lütke Entrup, H.-O. Günther, P. van Beek, M. Grunow and T. Seiler 5071

Book reviews 5101

No. 24 15 December 2005

Distributed supply-chain project rescheduling: part I—Impacts of information-sharing strategies. G. Q. Huang, J. S. K. Lau, K. L. Mak and L. Liang 5107

Hybrid Petri net and digraph approach for deadlock prevention in automated manufacturing systems. G. Maione and F. DiCesare 5131

Inventory control of raw materials under stochastic and seasonal lead times. E. A. Silver and N. Zufferey 5161

Multivariate statistical diagnosis using triangular representation of fault patterns in principal component space. H.-W. Cho, K.-J. Kim and M. K. Jeong 5181

A fuzzy ANP-based approach to R&D project selection: a case study. R. P. Mohanty, R. Agarwal, A. K. Choudhury and M. K. Tiwari 5199

AS/RS dwell-point strategy selection at high system utilization: a simulation study to investigate the magnitude of the benefit. R. D. Meller and A. Mungwattana 5217

Application of bivariate parameter design to the optimization of the operating conditions of a turning process. C.-Y. Chou, C.-H. Chen, C.-C. Yang and C.-C. Wu 5229

Tabu search-based approach to multi-objective machine-part cell formation. D. Lei and Z. Wu 5241

Multilevel capacitated lot-sizing and resource-constrained project scheduling: an integrating perspective. H. Stadtler 5253
